What is LoanLIST?

The purpose of LoanLIST is to allow secondary-market participants to research current loan information and recent payment history. LoanLIST provides up to date loan and payment detail to enable clients to perform their business procedures, e.g., Pooling, Asset Sale.

LoanList is an application that can be found in the “FTA Portal” section of the Capital Access Financial System (CAFS). Once you are in this portal, LoanList is located within the Pooling tab located on the left-side of the page

Users can enter up to a maximum of 730 FTA GP numbers in the “Enter Loan Numbers” search box. Based on the Location ID used while setting up CAFS access, users will be assigned a “Lender” role or an “Investor” and/or “Originator Fee Holder” role. It is not possible to see all three roles in one profile as above, which is reserved for SBA administrative roles.

There are also two display options, “View” and “Download”. “View” will display the LoanLIST data on the screen as per the screenshot above. “Download” will trigger a pop-up window to download a CSV file on your desktop. The columns in the downloaded file correspond to each field displayed on the screen.

Additional LoanLIST Scenarios

Daily Updates

LoanLIST is updated with the most current information and activity each business day. All updates will be reflected within one business day. The LoanLIST maintenance window is from 6AM – 9 AM EST daily.

“Record posted as of:” appears at the top of the LoanLIST screen which indicates the date the record was last updated.

Note: Error codes may be received while using the “Download” function during the daily maintenance window. The download file will not include all the requested FTA GP numbers and instead include HTML code at the bottom of the file. If this happens, please try to use the “Download” function later in the day and if it persists, please contact the FTA Help Desk (FTA@sba.gov).

Status Messages

A status message will appear on the LoanLIST screen for specific loan search results:

- 1. Incorrect loan number** – when an invalid number is entered into the LoanLIST search box you will see the below status message in the Lender, Investor and Originator views at the top:

* This loan is a non-secondary market loan or an invalid GP number.
- 2. Payoffs** – when a loan is paid-off you will see the below status message in the Lender, Investor and Originator views at the bottom, payment history section:

* This loan has been paid-off. Payments history is not available.
- 3. Pooling** – when a loan is in a pool the Investor view will have the following status message at the bottom, payment history section:

* Payment history is not available. The loan is in an SBA pool.
- 4. Originators** – when there is no Originator on the loan, the Originator Fee Holder view will have the following status message at the bottom, payment history section:

* There is no originator for this loan.

Settlement

Settlements occur when a 7(a) Lender decides to sell the portion of a loan that has been guaranteed by the U.S. Small Business Administration (SBA) in the secondary market to an Investor. Newly settled loans appear in LoanLIST within one business day of the settlement date. A newly settled loan will appear as depicted below. You will notice the Outstanding Balance will match the Certificate Face Amount.

Adjustments

When there is a discrepancy on LoanLIST within the payment history section a reconciliation is needed. The FTA’s reconciliation team will generate a transcript and make the necessary adjustments to the data in LoanLIST. There will be an “adjustment line” showing **only** the corrected “Outstanding Balance” and “Interest To Date”. This adjusted data is then calculated into the next payment so that LoanLIST may reflect the correct data moving forward.

The adjustment line remains on LoanLIST until the next payment is made. At this time, the adjustment line will disappear, and be replaced with a full payment line showing all fields. This new payment line will use the “Interest To Date” from the adjustment line as the “Interest From Date”. This will often result in what appears to be a gap in interest dates, but it is only because a reconciliation was done resulting in a correction to the data.
